Dear pateint, noneffete, nonsnob friend, I'm using just a scap of paper so you will not be intimindate by another envelope from me after what you've said. The reason is very simple: I've just finished a draft of what I guarantee will blow your mind when you get it and its documentation. As soon as I finish this I will read and correct it and once again I'll be filing a retyped rough draft. I am not certain hoe soon I'll be able to mail it because of medical appointments, being a state witness in a local prosecution and the need to have the xeroxing done commertially. But when you get the next mailing, for which I'll have no time for any accompnaying letter, please do not be discouraged and read what is only 9 double-spaced pages on this machine. The rest will be until-now secret FBI documents.

Hopefully, Hal, 1/16/85
